Naval aviation is the application of military air power by navies, whether from warships that embark aircraft, or land bases.. Naval aviation is typically projected to a position nearer the target by way of an aircraft carrier. Carrier-based aircraft must be sturdy enough to withstand demanding carrier operations. They must be able to launch in a short distance and be sturdy and flexible ...

Aviators. Aviators use GPS to increase their ability to keep safety up to par and also to maintain the efficiency of the flight. A GPS navigation system can help aviators always know their position and its surroundings in all of its phases starting from its departure all the way to its landing point. Also, a GPS now allows an aviator from start to finish not to have to depend on ground ...

Aviators and sailors sometimes refer to this point as the "south polar pit" because there are no bright stars marking it. The Southern Celestial Pole can also be located by drawing a line between the stars Alpha and Beta Centauri in Centaurus constellation , and finding the point where this line intersects with the one from Alpha to Gamma Crucis .
