A countercurrent mechanism system is a mechanism that expends energy to create a concentration gradient.. It is found wide in nature and especially in mammalian organs. For example, it can refer to the process that is underlying the process of urine concentration, that is, the production of hyperosmotic urine by the mammalian kidney.

The ability to concentrate urine is also present in birds.

Hyperplasia (from ancient Greek ὑπέρῳ hyper, "over" + πλάσις plasis, "formation"), or hypergenesis, is an increase in the amount of organic tissue that results from cell proliferation. It may lead to the gross enlargement of an organ, and the term is sometimes confused with benign neoplasia or benign tumor.. Hyperplasia is a common preneoplastic response to stimulus.
